# Innovate *Together*

- **Community**

- A center of gravity for open source JavaScript
- Crossing domain, technology and business sectors

- **Collaboration**

- Provide a location and mechanisms for the community to work together
- Guidelines and principles for growing large, diverse contributor bases

- **Continuity**

- A large, collaborative community increases innovation while providing for long-term sustainability

# Community

23 open source projects spanning multiple segments of the JavaScript ecosystem

The **innovation layer** for the application developer

# Community

**Jed**

dōjō  
toolkit

# Community

Approaching **6,000** unique contributors across  
20+ GitHub orgs and 200+ repos

# Project Support

# Project Support

The JS Foundation is an umbrella organization, serving an array of projects with many differing needs

- Neutral governance and IP ownership
- Licensing and Legal
- Infrastructure
- Financial assistance

# Project Support - Mentorship Program

- Position projects to be well maintained and for long-term sustainability of that project
- Provide guidelines toward that goal
  - Controlling organization ratios
  - Documented processes and procedures around road maps, releases, contribution and increased responsibility

# Project Support - Mentorship Program

**webpack**

# Sustainability

webpack has grown to 475 contributors  
over the last 4 months

# Long-term Support

jQuery still runs on **80%** of top million websites  
and **>18%** of the entire internet

# Long-term Support

The jQuery CDN (code.jquery.com) averages  
**~15k requests/second** which translates to  
**>36 Billion downloads/month**  
and transfers of **>1.6 PB/month**

# Long-term Support

Aggregate project downloads from npm are  
**~80 million/month!**
